

YASH HARISH GANGATE

MCA Student | Web Developer

Sangli, Maharashtra, India | +91 95617 51387 | yashgangate@gmail.com | linkedin.com/in/yash-gangate | github.com/yashgangate-1035

PROFESSIONAL SUMMARY

MCA student with a strong academic record and hands-on experience in full-stack web application development using Java, JavaScript, React.js, HTML5, CSS3, and SQL. Skilled in building responsive, user-focused web applications, developing REST APIs, and working with relational databases. Experienced in Object-Oriented Programming (OOP), Database Management Systems (DBMS), and Git-based version control. Seeking a Software Developer / Web Developer role to apply technical skills and problem-solving ability toward building scalable, production-ready applications.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, SQL

Web Development: HTML5, CSS3, JavaScript, React.js, Responsive Web Design

Backend Development: JSP (JavaServer Pages), Servlets, REST API Development, Node.js, Express.js

Databases: MySQL, MongoDB, Database Design

Core Concepts: Object-Oriented Programming (OOP), Data Structures, DBMS, Software Development Life Cycle (SDLC)

Tools & Platforms: Git, GitHub, VS Code, Eclipse IDE

PROJECTS

SkillSwap — Full-Stack Skill Exchange Platform | [Live Project](#)

MCA First Year Academic Project | React.js, JavaScript, Node.js, Express.js, MongoDB

- Developed a full-stack web platform enabling users to discover, share, and exchange skills through a database-driven application architecture.
- Built responsive, component-based user interfaces in React.js and integrated frontend components with backend services for seamless data flow.
- Designed data models and managed user, skill, and platform data using MongoDB as the primary database.
- Implemented backend REST API endpoints using Node.js and Express.js to support core application functionality.
- Used Git and GitHub for source code management and version control.

Deforestation Detector — Satellite-Based Deforestation Monitoring System | [Live Project](#)

MCA Academic Project | Python, FastAPI, OpenCV, React.js, Vite, Tailwind CSS

- Designed and developed a full-stack web application for monitoring, analyzing, and detecting deforestation using satellite imagery and geospatial analytics.
- Built a Python backend with FastAPI and Uvicorn, structuring API routers and core configuration modules for a scalable, maintainable service architecture.
- Implemented a deforestation detection algorithm using OpenCV and the Excess Green (ExG) vegetation index to analyze paired satellite images and identify vegetation loss.
- Developed a responsive frontend using React, Vite, and Tailwind CSS to visualize detection results and trigger authority alerts when significant deforestation is detected.

EDUCATION

Master of Computer Applications (MCA) — Rajarambapu Institute of Technology | Pursuing, First Year | CGPA: 9.09

Bachelor of Computer Applications (BCA) — KBP College, Islampur | 2025 | CGPA: 8.98

Higher Secondary Certificate (HSC) — Maharashtra State Board | 2022 | 72.33%

Secondary School Certificate (SSC) — Maharashtra State Board | 2020 | 87.40%

CERTIFICATIONS

Core and Advanced Java — CodeExpert Technology | Data Analytics with Python and Power BI — EduSkills Virtual Internship | Data Processing and Visualization — FutureSkills Prime

SOFT SKILLS

Problem Solving, Team Collaboration, Communication, Adaptability, Continuous Learning

EXTRA-CURRICULAR ACTIVITIES

- Led non-technical events and coordinated technical events at Rajarambapu Institute of Technology (RIT), contributing to successful event planning and execution.
